

Making Inferences and Predictions – Test Strategy

1. Look at the **title** of the passage and make a prediction about what you will read.

2. Look for **4 repeated words** in the text and write a sentence using the word and describing what you think the passage will be about.

3. Look at the **first** paragraph, and write down what it is about.

4. Look at the **last** paragraph, and write down what it is about.

5. Read each paragraph, and annotate **all** of them (underline key words/sentences in the paragraph and write down, in the margins, why you highlighted them).
